

Product - Description:	Fountain solution additive for offset printing
Application range:	Sheet-fed offset Alcohol damping systems all water qualities
Dosage:	3 % with Isopropylalcohol (max. 5% Isopropylalcohol recommended) 4 % without Isopropylalcohol
Features:	The raw materials combine advantages (high plate protection, extremely stable ink-/water balance) also in case of IPA-free printing. At alcohol-free printing improved ink brilliance and improved contrast is achieved. The product is especially developed for alcohol-free printing. Protected against bacterial contamination and corrosion.
pH - value:	4,70 - 4,85 concentrated 4,8 - 5,20 dilution, depending on water quality and dosage
Conductivity:	5,5mS - 6,5mS concentrated, ca. <u>465 µS / 1% addition</u> in the fountain solution
Colour:	yellow
Density:	1,11 kg/l
Flash point:	> 63 °C
Container:	10 kg, 20 kg, 60 kg, 200 kg, 600 kg, 1000 kg
Storage:	0 – 35°C, do not expose to sun directly. Use within 6 month after delivery. Protect against frost.
Remarks:	Use only plastic pumps for this product.
